Individuals associated with families from the Latino and Immigrant samples, added to the PSID in 1990/1992 and 1997/1999, and 2017 respectively, were assigned 1968 IDs so that they, too, have unique identifiers compatible with the PSID structure for the core (SRC and Census) sample.

Non-comparability Notes Appendix

I-d Missing data were allowed in 1968-1974 on
this variable; from 1975 onward,
assignments were made and accuracy codes
were used. See footnote h below.

I-f The 1983 and later years' codings of
relationship to head are much more
detailed than in previous years. We hope
some day to recode relationship to head
for 1968-1982 in the same detail.

I-h Due to a growing demand for more detailed
information on individual incomes, each
person's income was split into taxable and
transfer amounts beginning in 1975.
Variables comparable to the total money
income variables of the 1968 through 1974
waves can be created by adding these two
components. Also beginning in 1975, we
decided to discontinue coding missing data
for individual-level incomes and work
hours, as had been done since 1968,
because editors must assign amounts for
family-level totals anyway. Each income
and hours variable has its own accuracy
code from 1975 on. Great care must be
exercised in attempting cross-year
comparisons for Heads and/or Wives/"Wives"
using the individual-level work hours and
money income variables. The following
table is a year-by-year synopsis of the
rules for creation of these variables. In
general, since for Heads and Wives/"Wives"
all the income and work hours information
is available in a more correct and
detailed form at the family level, a
recoding program should be utilized to
insert those data rather than using
information found in the individual
portion of the data records--THIS APPLIES
TO HEADS AND WIVES/"WIVES" ONLY. 1968
